

# YAML

Thursday, 26 June 2025 13:58

It's human readable language  
Easy to understand

Three things:-

1. Key value :-
  - a. Key is ID
    - i. ID: (Value) Eg:- ID: XYZ-123
2. List:-
  - a. To define in yaml in one key and second line two space (from the third value of Alphabets), put (-) and value 1
    - i. Key:
    - ii. - value1
    - iii. - value2
    - iv. - value3
  - 1) Eg:-
    - a) Tools:
    - b) - kubernetes
    - c) - Docker
    - d) - Ansible
3. Nested list and dictionaries:-
  - a. Eg:-
    - i. Server:
    - ii. (two space) - name : demo
    - iii. (two space) - port:
    - iv. (three space) - 80
    - 8080
